

Nutrition Innovation Globally Awarded as a “Best Small Business” by the United Nations.

The **UN Food Systems Summit** competition “**Best Small Business: Good Food for All**” has named **Nutrition Innovation** as one of the “50 best small and medium-sized enterprises” from across the world transforming food systems for a better tomorrow. The competition was designed to uncover the innovators who are leading the charge for more sustainable, inclusive and resilient food systems.

“It is an honour and a privilege to be nominated as global leaders by the **UN Food Systems Summit**. It’s a testimony to not only our innovations, but all of our partners around the world” said **Founder and Chairman of Nutrition Innovation, Dr David Kannar**. “Our objectives have always been to create innovations, like **Nucane™**, to solve global health and nutrition challenges, urgently change millions of lives and help the world meet & beat the 2030 Sustainable Development Goals. We believe collaboration and partnerships are essential to maximising reach, scaling around the world, gaining access to all communities and unleashing affordable nutrition for all. The **UN Food Systems Summit** shines a powerful global spotlight on innovation so that key stakeholders, with resources, influence & power, are compelled to join in and become part of the solution. We are proud to be recognised by the **UN Food Systems Summit**, but this is just one step towards a sustainable, healthier and more balanced and diverse future for all.”

The **UN Food Systems Summit** described the importance of the awards as “Small businesses around the world were invited to share how they help provide healthy food that is good for the environment, good for their communities and create jobs for people locally. Listening to the diverse voices of small businesses is a key component of the Summit’s process to identify bold, new solutions for improving food systems. The 50 winners were selected from nearly 2,000 entries across 135 countries.”

About Nutrition Innovation:

We are a highly awarded innovation company, founded by leading scientists, Dr Greg Szto and Dr David Kannar, that is transforming global health by creating breakthroughs in food and pharma technology. These are designed to tackle the urgent challenges of diabetes, obesity and other health problems that impact individuals, families and society, everywhere. We have unique, patentable, science-backed intellectual property and technology that creates:

- **Nucane Raw:** a scalable, healthier sugar low glycemic sugar.
- **Nucane Life:** a revolutionary sugar powder designed to reduce sugar by up to 70% in a food.
- **NXP:** a super-concentrated polyphenol powder that helps fight diabetes and metabolises protein faster.
